Sam Okafor

Senior Product Manager, Data

Leeds, UK | sam.okafor@example.com | linkedin.com/in/sam-okafor-example

PROFILE

Product manager with 12 years turning clinical and operational data into products people use. I shipped Tidewater Insights, a regulated clinical reporting product, into production in three NHS trusts, reaching 1,200 weekly active clinicians.

I own **data products** end to end: discovery with **clinical and operational leaders**, specifications for **pipelines and models** with data engineers and data scientists, and **adoption and outcome metrics** reviewed weekly.

Comfortable with SQL and data models, information governance reviews, and **forecasting** features that change how operations teams plan.

EXPERTISE

- **Data Product Discovery**: Finding the reporting and workflow problems ward managers and operational leaders act on, validated with prototypes on real data.
- **Adoption and Outcome Metrics**: Defining activation, weekly active use and time-to-insight, and running controlled trust-by-trust rollouts.
- **Pipelines and Models**: Specifying data pipelines and forecasting features directly with data engineers and data scientists.
- **Data Quality and Information Governance**: Quality checks, lineage and access controls that pass IG review first time.
- **Platform Thinking**: Shared data services used by several squads, with clear contracts and versioning.

ACHIEVEMENTS

- **Tidewater Insights**: Shipped a regulated clinical reporting product to production in 3 NHS trusts within 9 months, reaching 1,200 weekly active clinicians.
- **Time to Insight**: Cut median report turnaround for ward managers from 6 days to same day.
- **Data Quality Layer**: Reduced reporting defects by 70% with automated checks and lineage across 40 data feeds.
- **Demand Forecasting**: Shipped a forecasting feature for route planners that lifted vehicle utilisation by 11%.

WORK EXPERIENCE

Senior Product Manager | Larkspur Systems

03/2022 - Present

- **Tidewater Insights**: Own the roadmap and delivery of the clinical reporting product used by 1,200 weekly active clinicians across 3 NHS trusts.
- **Discovery with Clinical and Operational Leaders**: Ran prototype-based discovery with ward managers, validating 5 report types before build and killing 3.
- **Adoption Metrics**: Designed the trust-by-trust rollout with activation and time-to-insight metrics reviewed weekly.
- **Data Quality Layer**: Introduced automated checks and lineage across 40 feeds, cutting reporting defects by 70%.
- **Information Governance**: Contributed to and drove the safety case reviews, passing IG in all three trusts on first submission.
- **NHS Procurement**: Led three NHS framework bids, winning two.

Product Manager | Tidewater Freight *06/2019 - 02/2022*

- **Demand Forecasting**: Shipped a forecasting feature for route planners that lifted vehicle utilisation by 11%.
- **Data Pipelines**: Specified and prioritised the telemetry pipeline that fed the forecasting model, working daily with data engineers.
- **Planner Workflow**: Redesigned the daily planning tool with 40 planners, cutting planning time by a third.

Data Analyst, then Senior Analyst | Tidewater Freight *09/2014 - 05/2019*

- **Fleet Analytics**: Built the utilisation and fuel dashboards used by operations leadership.
- **Pricing Analysis**: Modelled contract pricing scenarios that informed a 6% margin improvement.

EDUCATION

M.Sc. Data Science | University of Leeds *09/2013 - 09/2014*

B.Sc. Economics | University of Manchester *09/2010 - 06/2013*

PROJECTS

- **Open Ward Metrics**: Open-source dashboard templates for ward-level operational data, used by two trusts outside Larkspur's customer base.
